SAGA® MINK - THE TOP QUALITY MINK

Finnish Fur Sales encourages fur farmers to invest in the production of top quality mink. Superb quality is guaranteed by highly controlled farming conditions. Buying SAGA® mink also ensures you and your customers that the welfare of the animals is looked after.

A VERSATILE COLLECTION OF SAGA® MINK

Finnish Fur Sales offers a unique selection of mink skins, marketed under the SAGA® brand. In addition to beautiful collections of main types; Scanblack, Mahogany, Scanbrown and Scanglow, the offering includes all different mutations - an endless variety of beautiful natural colours.

The company sells over six million mink skins per year. 25% of the mink is of Finnish origin, while the majority comes from other important mink producing countries, Denmark, Norway, Sweden, the Netherlands etc., making the SAGA® mink collection truly European.

SAGA® GRADING SYSTEM - WORLD'S BEST MINK GRADING

Finnish Fur Sales has been determined in perfecting the grading process. Years of systematic development have borne fruit, with buyers acclaiming Finnish Fur Sales' mink grading as the world's best. Automatic machines unique to our company handle the beginning of the process from measuring to colour grading. Meticulous quality grading based on the SAGA® criteria, plus final grading on the basis of nap length - extra short, short, medium, long - give our SAGA® mink collection a unique consistency.
